

Value nature as a living being; say YES! to the rights of nature

Today, Nature is treated as property under current law. Nature has no standing and therefore, cannot be represented directly in a court of law. Our call is for governments, corporations and civil society to value Nature as a living being that has rights, in all its life forms, with the right to exist, persist, maintain and regenerate its vital cycles rather than being seen as property, a resource to be consumed.

We are all part of Mother Earth, an indivisible, living community of interrelated forms. It is clearly evident that all forms of exploitation, abuse and contamination have caused great destruction to Mother Earth.

Be the voice now for Rights of Nature. We are collecting One Million signatures to present to the United Nations and heads of States. We have delivered 116,758 signatures to the Secretary General Ban Ki-moon at the Earth Summit in June 2012/Rio+20 and we are continuing until we have one million!

Be one of those voices that call forth the acceptance of the Universal Declaration of The Rights of Mother Earth by the UN and express that you would like all Nations to adopt Rights Of Nature by signing this petition.
